PZ-41SLB LOSSNAY® ERV REMOTE CONTROLLER SPECIFICATIONS

- Controls — ON/OFF.
- Allows user to set operation mode:
 - *Heat Recovery Mode* — Ventilation air and return air both enter the Lossnay core for complete energy exchange.

Exchanges both sensible and latent energy.

- *Bypass Mode* — Ventilation air enters through the Lossnay core and return air bypasses the core and is exhausted.

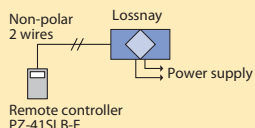

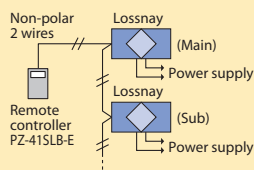

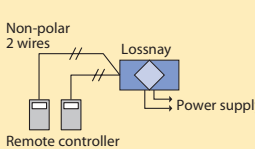

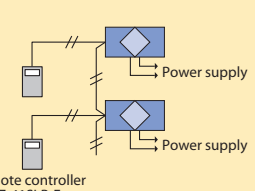

No energy transfer occurs.

- *Auto Mode* — Lossnay automatically changes between the Bypass and Heat Recovery modes based on outside air temperature conditions.

- Fan speed setting (depending on the Lossnay model).
- Diagnostics — Displays four-digit error code and error unit address.
- Up to 15 indoor units can be interlocked to a single Lossnay PZ-41SLB controller.
- Filter button resets filter indicator.
- Dimensions — 2-3/4" W x 4-3/4" H x 1-5/8" D.

System Examples

<p>One Lossnay® with one remote controller</p>  <p>One Lossnay® unit is operated independently with one remote controller.</p>	<p>Multiple Lossnay® units with one remote controller</p>  <p>Up to 15 Lossnay® units can be controlled at one time with one remote controller.</p>	<p>Two remote controller system with one Lossnay®</p>  <p>The Lossnay® can be controlled from two remote locations. The remote controller gives priority to the last touch.</p>	<p>Two remote controller system with multiple Lossnay units</p>  <p>It is also possible to operate two remote controller units when using multiple Lossnay® units.</p>
